## MINER FALLS DEAD AS HE STRIKES IT RICH

LEADVILLE, Colo., Nov. 5.—Charles Halverson, an old-time prospector, dropped dead today shortly after being taken to the county hospital. Two days ago the old man was digging prospect holes in the back yard of his home on the outskirts of the city. A physician had told Halverson to quit work, as his heart was weak. Halverson insisted on continuing, and asked the doctor to have some samples of the ore he had found assayed. The rock carried 2 ounces of gold. The doctor returned to the prospector's cabin last night and found the old man helpless in bed. He was removed to the county hospital and died today. It is understood that the claim on which Halverson's cabin is located belongs to the Eli Mining company. Halverson was 60 years old, and has a brother living in Denver.

## RICH MAN LEAVES MILLIONS TO CHURCHES

(Associated Press)  
NEW YORK, Nov. 5.—When the will of John Stuart Kennedy, one of America's little known rich men, who died of whooping cough at his residence in this city last Sunday, was filed for probate today, it was learned that more than \$25,000,000 was bequeathed to religious, charitable and educational institutions. The gift is the largest single contribution of its kind ever made, and the beneficiaries include educational and church institutions in the North, South, East and West of this country, and one abroad, sixty in all. Nearly half of the \$25,000,000 goes to institutions connected with the Presbyterian church, of which Kennedy was an active member for many years. Aside from these gifts Kennedy left approximately \$35,000,000 to his wife, relatives, and a number of friends and employees.

(By Associated Press.)  
CLEVELAND, Ohio, Nov. 5.—The strike of the pupils of the West high school against afternoon sessions and the high prices of lunches continues today. When school convened not more than 100 pupils were in the building. The other 400 held a meeting and adopted resolutions to prolong the fight. It was decided to invite the pupils of other high schools to join in the strike. West high school strikers assembled in the Lincoln high school yard and gave their yell and blew horns, but the Lincoln pupils refused to walk out. The West high boys then withdrew, but left ten of their number to picket the school yards. The pickets were driven away by the principal and a policeman.

## ASKS COURT FOR PERMISSION TO MAKE SURVEY

GOLDFIELD, Nov. 5.—Yesterday there was an application filed in court on the part of the Round Mountain Red Top Mining company and the Round Mountain Sphinx Mining company for the privilege of making a survey of the underground workings of the Sunnyside mine. The case is set for hearing Monday, November 8. Speaking of this matter, Mr. Loftus said: "The Round Mountain Mining company in its work of development has ever been most careful to preserve and act within its established property rights. The matter now brought before the public for the first time, is not a new proposition to the Round Mountain Mining company management. Overtures have been made to the Sphinx and Red Top properties from time to time, which overtures have extended over a period of a year or more; but nothing having come of it, this questionable move has been made. Minor stockholders, not familiar with mine conditions, need feel no serious concern for the ultimate results."

## NORTH DAKOTA NEAR BREAKS SPEED RECORDS

Nearly Captures Record When an Accident in Boiler Room Causes Delay  
---Several Seamen Injured.

Injured Men Urge Engineer Force to Keep the Battleship on her Course---Vessel Returns to Port to Secure Aid.

(By Associated Press.)  
PORTSMOUTH, N. H., Nov. 5.—As the new battleship North Dakota was completing a four hour endurance run at a 21-knot gait off the New England coast today, with the battleship speed championship of America almost within her grasp, a boiler room accident robbed her of her laurels and sent her scurrying into port to land four injured men. The ship, nevertheless, exceeded the contract requirement of 21 knots an hour by making 21.71 for the first two hours, 21.64 in the third hour, and 21 knots flat as she hurried, on the fourth hour, into this port. The four injured men are William Grange, water tender; John Souden, coal passer; A. Peterson, fireman; Peter McConnell, fireman. On the first two hours' run the engines developed a speed of 32,000 horsepower. A few minutes after the battleship had passed Cape Anne and while entering into the fourth hour of the test, a seven-inch tube in one of the lower rows of boilers blew out and filled the room with steam. The engineers immediately cut off four of the fourteen boilers. All of the injured men urged the engineer force to disregard their injuries, and to keep the battleship at her work. Under the ten boilers 21 knots was maintained for the balance of the time, and at 4 o'clock the North Dakota steamed into this harbor and sent the injured men ashore. The defective tube was replaced, and arrangements were made at midnight to leave for a 24-hour run at a speed of 19 knots an hour. Tonight it is reported that all the injured will probably recover, but it is feared that Souden will lose his eyesight. In addition to the four men brought ashore, twelve others suffered scalding, their injuries being of a minor character.

## TAFT WITNESSES ACCIDENT WHEN A SALUTE IS FIRER

Premature Explosion of Small Cannon Causes Injury to Two Over Zealous South Carolina Patriots.

(By Associated Press.)  
CHARLESTON, S. C., Nov. 5.—President Taft headed a procession of autos through the principal business streets tonight soon after his arrival, and later went to the home of Mayor Rhett, where he passed the night. The president was the guest of honor at a banquet tendered him by the city of Charleston, and leaves tomorrow morning for Columbia, S. C. Taft had a busy day in Savannah. During the sail down the river to Fort Screven he witnessed an accident in which it was at first thought that two men were killed. As matters turned out, one man, a negro, lost an arm, and another an eye. The two men were firing a salute to the president from a small cannon drawn up on the water front. A premature explosion occurred as the negro was ramming a charge of powder, and in a cloud of smoke following the report, the president saw a man flying through the air and fall into the water. The ramrod shot across the bow of the revenue cutter Yamacraw, on the deck of which the president was standing. Taft called attention to the accident and immediately the man struggling in the water was rescued. The president was greatly relieved when he learned upon landing that there had been no loss of life.

## SCHEDULE FOR FEDERAL CENSUS IS FORMULATED

(By Associated Press.)  
WASHINGTON, Nov. 5.—The general schedule which will be used in the federal census of manufactures for the calendar year 1909, has been formulated, and about 700,000 printed copies have been ordered by Census Director E. Dana Durand. The schedule is in the form of a four-page folder, about 9x11 1/2 inches in size. It is smaller and simpler than the ones upon which the 1900 and 1905 censuses of manufactures were taken. It has less than half as many spaces for entries as the earlier ones and seems likely to insure less labor and greater accuracy in the collection of the manufactures data. There are in the general schedule thirteen principal questions, with their subdivisions. This is the same number as in the general schedule of 1905. There are, however, important differences between the two schedules. These comprise, in the 1909 schedule, the new questions authorized by congress; the elimination of former queries to which it is impossible to obtain approximately accurate replies; and also the simplification of others by their separation or combination in other forms.

A return game has been arranged and will be played in this city on Thanksgiving afternoon.
